Feature.

Ask your server for today's feature.

Each management team is responsible for creating their own feature for their restaurant opening.

During the term, each lab class is responsible for operating 3 restaurant openings. Each student will take on the role of manager, line cook, and server once.

Thank you for supporting this learning opportunity! Without you, we wouldn't be able to provide this experience to our students.

We appreciate your patience and understanding as our students gain hands-on experience.
